3. COMPLAINT DESCRIPTION (ОПИСАНИЕ ПРОБЛЕМЫ)

On June 18, 2026, at approximately 14:35, I attempted to pay a restaurant bill via the mobile app. The application froze during the processing state and displayed an internal server error. No digital receipt was generated.

However, upon checking my account balance later that day, I noticed that \$120.00 USD was successfully debited twice for the same single transaction. I have attached the bank statement showing both identical charges. The merchant confirms they only received one payment.

4. DESIRED RESOLUTION (ЖЕЛАЕМОЕ РЕШЕНИЕ)

I request an immediate reversal and refund of the duplicate charge (\$120.00 USD) back to my checking account. Additionally, I expect a formal update regarding the app's stability issues during peak hours to ensure this does not happen again.
